

HEALTH & WELLNESS

CETYLMOBILITY®

Get up and move

DESCRIPTION

If you experience stiffness from overexertion, your joints may need nutritional support to help them move more smoothly and do what they're designed to do.

Your joints work in harmony with your muscles to give you mobility and flexibility. Bones at each joint site are capped in shock-absorbing cartilage that's smooth enough to allow the bones to glide. The joint capsule attaches to the bone on either side of the joint and is lubricated by the synovial membrane. Ligaments add stability, and muscles and tendons hold the joint together. All these structures work together for healthy, smooth-moving joints.

Cetyl fatty acid esters, the main ingredients in CetylMobility®, are natural oil compounds that help lubricate joints and support joint health. In addition, this supplement contains type II collagen and minerals to provide additional support for joints.*

CetylMobility® capsules give you peace of mind with a powerful formula for overall joint health.*

BENEFITS

- Supports joint health*

KEY INGREDIENTS

- *Mixed fatty acid esters (cetyl myristoleate, cetyl myristate, cetyl palmileatel, cetyl laurate, cetyl palmitate, cetyl oleate)*
- *Type II collagen*
- *Mineral complex (magnesium, zinc, copper, manganese)*
