

NEWBRITE™ FABRIC SOFTENER

Naturally soft

DESCRIPTION

Most fabric softeners contain animal byproducts, such as C16 and C18 fatty acids from tallow, which is rendered beef or mutton fat. Why not get equal or better softening results with soy?

NewBrite™ Fabric Softener eliminates static and stiffness, leaving every fabric feeling exquisitely comfortable. Effective in warm or cold water, NewBrite Fabric Softener provides equal or superior softening results compared to tallow-based softeners.

Just one ounce of this soy-based, fragrance-free softener added to the final rinse brings out natural softness. And NewBrite Fabric Softener leaves all your clothes feeling soft.

BENEFITS

- Provides a soft, luxurious feel
- Works well in cold, warm, or hot water

RECOMMENDED USE

Add 3/4 capful (30 ml) to water in final rinse.

KEY INGREDIENTS

- **Cationic soy fabric softener**—stabilizing agents
