

PERSONAL CARE

RETENTION PLUS®

Your defense against skin aging

DESCRIPTION

The face is typically the first place to show visible signs of aging. As we lose elastin, which holds skin cells in place, wrinkles appear. Retention Plus® anti-aging cream is formulated to help the skin retain its youthful appearance.

Fast-absorbing Retention Plus® complements the skin's natural ability to maintain firmness. This rejuvenating cream features cross-linked elastin to increase resilience and ceramide-6 to support the skin's lipid bilayer.

BENEFITS

- Helps prevent the appearance of fine lines and wrinkles
- Helps support healthy collagen
- Supports normal skin elasticity
- Assists in maintaining healthy moisture levels
- Complements the skin's natural defenses

KEY INGREDIENTS

- *Ahnfeltia concinna extract*—This red algae extract provides a wide array of carotenoids.
- *Ceramide-6*—Helps prevent water evaporation from the skin's surface.
- *Cross-linked elastin*—Elastin molecules provide the skin with elasticity and resilience.
- *Ergothioneine*—Found in various plants, this antioxidant is a powerful scavenger of hydroxyl free radicals and oxygen free radicals.
- *Grape seed extract*—Provides protection against free radicals.
- *Phytosphingosine*—Works with ceramide-6 to increase beneficial results. Many competing products contain little or none of this important compound.
- *Retinyl palmitate*—This stable form of vitamin A supports skin.
- *Rose hips oil*—Featuring a high fatty acid content, this plant extract soothes sensitive or dry skin.
- *Tetrahexydecyl ascorbate*—This form of vitamin C helps support collagen.

PERSONAL CARE

RETENTION PLUS®

(continued)

DIRECTIONS: Apply Retention Plus to lined areas. Massage in well.

INGREDIENTS: Purified water, rosa canina fruit oil, sodium behenoyl lactylate, cetyl alcohol, stearic acid, tetrahexydecyl ascorbate, ahnfeltia concinna extract, phenoxyethanol, aloe barbadensis leaf juice, hydrolyzed elastin, dimethicone, ergothioneine, vitis vinifera (grape) seed extract, phytosphingosine, retinyl palmitate, ceramide 6 II, fragrance, methylparaben, stearyl glyceryl ether, butylparaben, ethylparaben, propylparaben.

MODE D'EMPLOI: Appliquez Retention Plus sur les flétrissures de la peau. Faites pénétrer en massant bien.

INGRÉDIENTES: Eau purifiée, huile d'églantine, lactylate benénoyl de sodium, alcool cétylique, acide stéarique, ascorbate tétrahéxydécyle, extrait d'ahnfeltia concinna, jus de feuille d'aloès barbadensis, élastine réticulée, diméthicone, ergothionine, extrait de graine vitis vinifera hydratée (raisin), phytosphingosine, palmitate de rétinyle, céramide 6 II, glycéryl éther de stéaryle, parfum, phénoxyéthanol, parahydroxybenzoate de méthyle, parahydroxybenzoate de butyle, parahydroxybenzoate d'éthyle, parahydroxybenzoate de propyle.
